

## Job details

### Teacher of Physics

Employer	<b>The Royal School Wolverhampton</b>
Contract type	<b>Full Time</b>
Contract term	<b>Permanent</b>
Closing date	<b>14<sup>th</sup> January 2019</b>
Job starts	<b>ASAP or Easter 2019</b>

The Royal School is seeking an experienced and innovative Physics Teacher to join the Science Department in this heavily oversubscribed free school. STEM subjects are at the heart of our education philosophy and student uptake in A-level and triple science subjects is high. The aptitude to teach a wide range of abilities from ages 11-18 is therefore essential. The ability and enthusiasm to teach A level with a flair and passion for the subject is crucial as well as flexibility within the department to contribute to other areas of science teaching.

Are you the person to stretch, challenge and inspire our students in and outside of the laboratory?

The Science Department strives for the highest standards of learning and teaching. The department has a suite of dedicated laboratories and prep rooms, all of which will soon be completely refurbished as a result of our new free school status. Our students participate in a balanced, practical-driven key stage three programme before choosing GCSE options where triple science uptake is high. Many of our students choose A-level sciences and numbers across all A-level courses are above average. Students opt for many of our STEM based extended day activities, which range from science clubs, CREST awards, go-kart engineering club and practical science presentations.

The Royal School is at an exciting time of development. The new free school is an all-through (Reception to Y13) 'independent' school without day fees whilst still providing excellent boarding at affordable fees. Alongside the growth in pupil numbers, there will be an expansion in the curriculum, enrichment activities and improved facilities, enabling us to extend and enhance still further the range of opportunities for all our young people.

The Royal School has achieved excellent academic results throughout its history and has an outstanding reputation for nurturing and developing confident, well-disciplined and successful individuals who progress successfully to the next stage of their life and career. We relish this next phase in its existence which enables us to review and build on our current success in preparing our young people for a rapidly evolving world. We hope that you will share in this passion for a broader educational opportunity.

Please visit The Royal School website for further information and details of how to apply.
